

L'abstention axillaire : possible ? pour qui ?

Mardi 24 février 2026

Limoges

DR MAXIME LEGROS

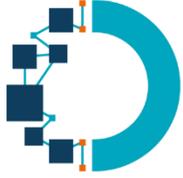

Gynécologue Obstétricien –
Polyclinique de Limoges site Emalleurs

- Réunion « Actualités dans la prise en charge du cancer du sein »

Liens d'intérêts

- PROVEPHARM : Convention pour contrat de recherche scientifique

Rappel historique

**II^{ème}
siècle**

Léonidas

Première description chirurgicale

1948

Patey

Conservation pectoraux

2000

Ganglion sentinelle

Stadification ciblée
Réduction morbidité

**XIX^{ème}
siècle**

Halsted

Mastectomie radicale
Concept d'extension centrifuge

1990

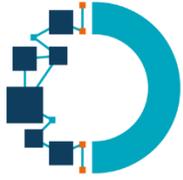

NSABP B-04

Pas de bénéfice du curage sur la survie
Remise en cause du dogme d'Halsted

2015

**AMAROS / ACOZOG
Z0011 / IBSCG 23-01**

Désescalade axillaire sans impact
sur la survie

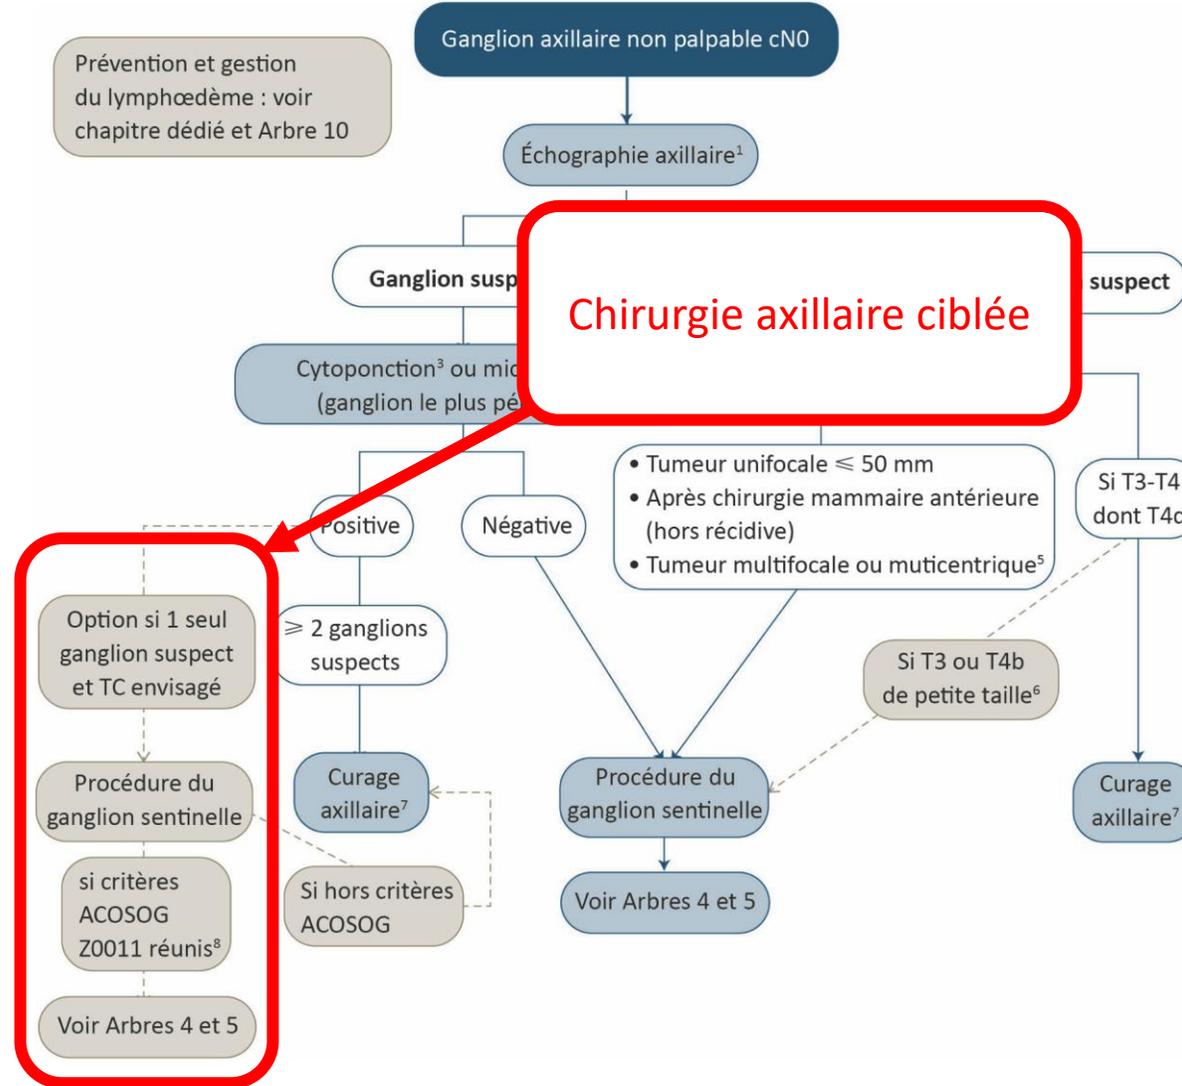

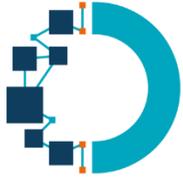

Recommandations INCA

Chirurgie première :

Critères ACOSOG :

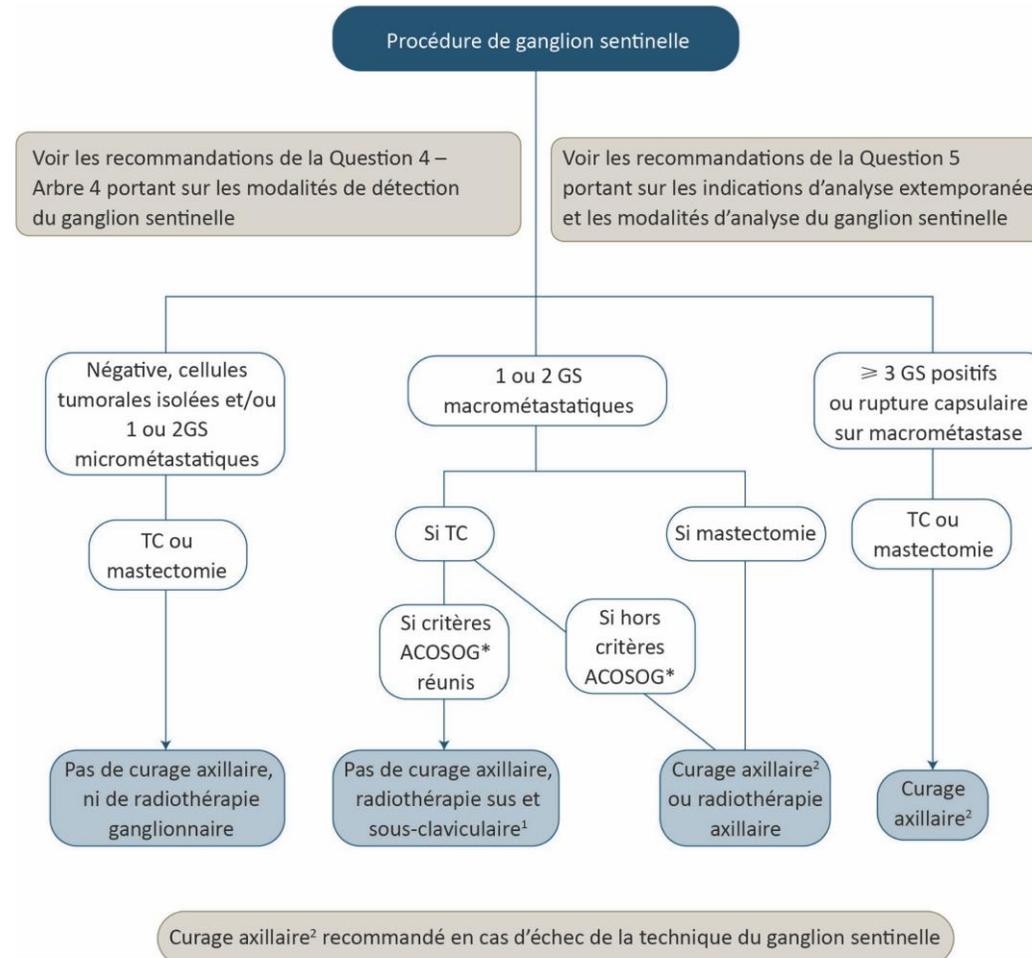

- Unifocal
- T1/T2
- cN0
- Chirurgie conservatrice
- Traitement adjuvant associé

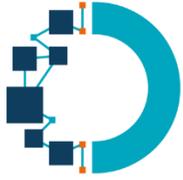

Recommandations INCA

A qui faire le CA après GS positif ?

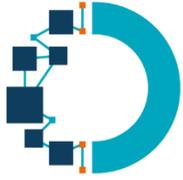

Après chimiothérapie NA ?

Ganglion sentinelle ?

- Validé si cN0 avant CNA
- Mais cN1 avant ?
 - On peut sous certaines conditions
 - ACOSOG Z1071 / SENTINA / SN FNAC
 - Attention risque de FN élevé

- Réponse radiologique complète
- Le ganglion biopsié soit clipé
- Exérèse du ganglion clipé
- Double détection du ganglion sentinelle
- 2-3 ganglions sentinelles prélevés

Plus loin ?

Abstention chirurgicale axillaire ?

- SOUND
- INSEMA
- BOOG 2013-08 (en cours)
- NAUTILUS (en cours)
- EUROBREAST 01 (en cours)

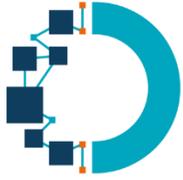

Etude SOUND

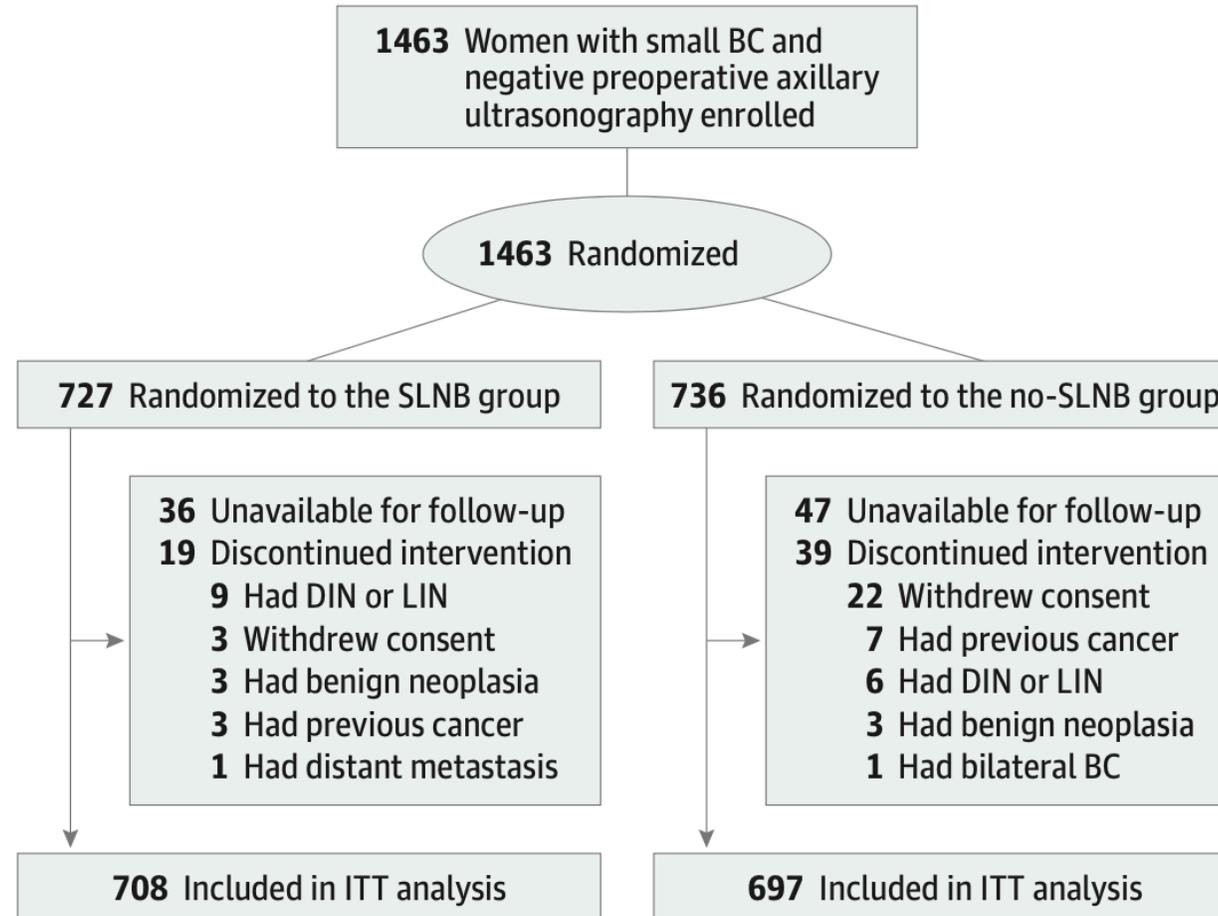

JAMA Oncol Published Online: September 21, 2023 2023;9;(11):1557-1564. doi:10.1001/jamaoncol.2023.3759

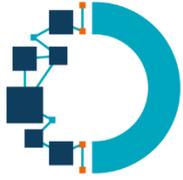

- Etude prospective Phase 3 de non-infériorité
- Multicentrique (Italie, Suisse, Espagne, Chili)
- **Compare l'omission du GS à l'exérèse du GS**
- Pas de limite d'âge
- Tumeur ≤ 2 cm
- Traitement conservateur suivi d'une radiothérapie
- cN0 et iN0 pré-opératoire
- Randomisation 1:1
- **CJP : DDFS à 5 ans**

Résultats

A Invasive Disease-free Survival in the Per-Protocol Population

No. at Risk

| | | | | | | | | | | |
|------------------------|------|------|------|------|------|------|------|------|-----|---|
| Surgery-omission group | 962 | 942 | 918 | 877 | 832 | 743 | 477 | 272 | 82 | 0 |
| Surgery group | 3896 | 3726 | 3582 | 3459 | 3286 | 2950 | 1842 | 1008 | 329 | 0 |

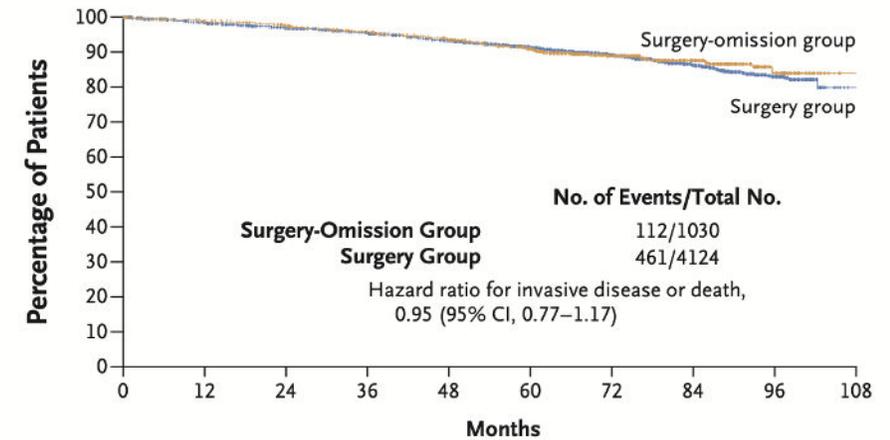

B Overall Survival in the Per-Protocol Population

No. at Risk

| | | | | | | | | | | |
|------------------------|------|------|------|------|------|------|------|------|-----|---|
| Surgery-omission group | 962 | 950 | 931 | 900 | 871 | 793 | 517 | 289 | 88 | 0 |
| Surgery group | 3896 | 3769 | 3659 | 3554 | 3417 | 3110 | 1978 | 1098 | 360 | 0 |

C Invasive Disease-free Survival in the Intention-to-Treat Population

No. at Risk

| | | | | | | | | | | |
|------------------------|------|------|------|------|------|------|------|------|-----|---|
| Surgery-omission group | 1030 | 997 | 961 | 917 | 865 | 774 | 494 | 283 | 83 | 0 |
| Surgery group | 4124 | 3891 | 3732 | 3597 | 3409 | 3051 | 1907 | 1039 | 336 | 0 |

Peut-on aller plus loin ?

Absence totale de chirurgie ?

- En cours d'étude après CNA
- HER 2+ ou Triple neg
- T1-T2
- Si réponse complète
- Nouvelles biopsies lit tumoral
- Radiothérapie complémentaire
- 50 patientes incluses, 31 patientes avec biopsie post CNA nég
- Suivi médian de 26,4 mois

Kuerer HM, Smith BD, Krishnamurthy S, et al. Eliminating breast surgery for invasive breast cancer in exceptional responders to neoadjuvant systemic therapy: a multicentre, single-arm, phase 2 trial. *Lancet Oncol.* 2022;23(12):1517-1524. doi:10.1016/S1470-2045(22)00613-1

Conclusion

- **Oui** une désescalade chirurgicale axillaire semble possible
- A déjà commencé et se poursuit
- L'omission du GS devient possible
- Recommandations de la société américaine d'oncologie :
 - > 70 ans, T1c, RH+, HER 2 : neg
- Attente des résultats des autres études
- Désescalade de la chirurgie mammaire ?

Conclusion

Merci de votre attention
